Instructions For Accessing USDF Data Online

The United States Dressage Federation has developed criteria allowing competitions to access individual, business and horse data.

Please forward these instructions to your Information Technology professional.

Immediate Lookups:

The following web addresses are used for looking up USDF memberships for individuals, businesses, and/or horses.

In order to look up an entity and get an immediate result in .txt format, please format your address as follows:

- **Individuals**

<http://www.usdf.org/verification/lookup/results.asp?id=123456&type=i>

where ID is the id number of the individual

- **Businesses**

<http://www.usdf.org/verification/lookup/results.asp?id=123456&type=b>

where ID is the id number of the business, farm and/or organization

- **Horses**

<http://www.usdf.org/verification/lookup/results.asp?id=123456&type=h>

where ID is the id number of the horse

The information that is returned is for the current competition year as of the day processed. Due to the fact that some competitions in December will want to validate in November or earlier for their competitors, you may also specify the year:

- **Individuals**

<http://www.usdf.org/verification/lookup/results.asp?id=123456&type=i&year=2010>

where ID is the id number of the individual

- **Businesses**

<http://www.usdf.org/verification/lookup/results.asp?id=123456&type=b&year=2010>

where ID is the id number of the business, farm and/or organization

- **Horses**

<http://www.usdf.org/verification/lookup/results.asp?id=123456&type=h&year=2010>

where ID is the id number of the horse

If the ID is invalid, the result returned will contain all '0's except for the first field which will contain the ID.
